This document contains of two major layouts of our KuehRaye website, which are sitemap and wireframes of our web layout.

Our website which submitted in Project 4's submission file, is about an ecommerce platform that sells Kuih Raya, which is a well-known Malay's traditional cookies usually eaten during Eid celebrations. Therefore, our team has decided to name our website as KuehRaye to match the products that we're selling.

Below is an image of our website's sitemap & wireframes:

Sitemap

Definition:

A sitemap is a file that lists out the URLs of all the essential pages of your website. The primary purpose is to help search engines understand your site and locate specific pages with ease.

KuehRaye Sitemap

Wireframe

Definition:

A wireframe is a schematic, a blueprint, useful to help you and your programmers and designers think and communicate about the structure of the software or website you're building.
